Burro Creek Lithium Project Update
Drill Results Provide Foundation for Maiden Mineral Resource
June 2018
Disclaimer

Forward looking statements
Some statements in this presentation regarding estimates or future events are forward looking statements. They involve risk and uncertainties that could cause actual results to differ from estimated results. Forward-looking statements include estimates of future production, reserve and mineralised material estimates, capital costs, and other estimates or prediction of future activities. They include statements preceded by words such as "believe", "estimate", "expect", "intend", "will" and similar expressions. Actual results could differ materially depending on such things as political events, labour relations, currency fluctuations and other general economic conditions, market prices for Zenith Minerals Limited products, timing of permits and other government approvals and requirements, change in operating conditions, lower than expected ore grades, unexpected ground and mining conditions, availability and cost of materials and equipment, and risks generally inherent in the ownership and operation of mining properties and investment in foreign countries.

Information presented is a summary
This presentation aims to provide a high level summary of various technical aspects of the Company's projects. For more details on the underlying technical parameters the reader is referred to the ASX Reports on the Zenith Minerals Limited's website: www.zenithminerals.com.au

JORC competent persons statements
The information in this report that relates to Zenith Exploration Results is based on information compiled by Mr Michael Clifford, who is a Member of the Australian Institute of Geoscientists and an employee of Zenith. Mr Clifford has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Clifford consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
**Key Projects - 2018**

**Gold**

Kavaklitepe JV (Turkey)
ZNC 30%. New discovery: 16m @ 4.7g/t Au and 9m @ 5.2g/t Au*

**Cobalt**

Split Rocks (WA-100%)
22m @ 0.06% Co & 0.70% Ni incl: 8m @ 0.12% Co & 0.96% Ni#

**Copper/Zinc**

Develin Creek (QLD -100%) - JORC massive sulphide resource 2.57Mt @ 1.76% Cu, 2.01% Zn, 0.24g/t Au & 9.6g/t Ag (Feb ’15). 50km of prospective strike.

**Lithium**

USA / Mexico JV (90%) – Five lithium projects (brines, pegmatite & clay) fully funded by Bradda Head/Jim Mellon farm-in.

Split Rocks (WA-100%) – 10km from KDR/SQM Earl Grey Lithium Deposit

---

(* Refer to ASX Releases 5th Oct 2016 & 16th June 2016,  # Refer to ASX Release 9th January 2018)
• Burro Creek is 1 of 5 projects included in deal with UK billionaire Jim Mellon’s Bradda Head Ltd*

• Zenith carried for US$5 million (A$6.6 million) expenditure over 3 years by Bradda Head to earn 55% project interest, one off right for Zenith to contribute at 45%, or be free carried at 30% to the end of pre-feasibility studies on two projects;

• Bradda Head to list on the London AIM exchange – planning for later in 2018

• Potential for future spin out of Zenith’s lithium portfolio on ASX, once projects are more advanced.

*For details refer to ASX Release 7th Mar 2017 & 27th April 2018
**Burro Creek Summary**

Large scale lithium clay target under exclusive option in Arizona, USA

**Drilling confirmed widespread, shallow thick zones of lithium bearing clay.**

Drill results lay foundation for maiden mineral resource estimate.

Positive initial metallurgical testwork results.

Three similar projects provide project comparatives.

---

Lithium Clay Projects:

BCN – NI43-101 Reserves (Source: bacanoralithium.com accessed 18/06/18);

LAC – NI43-101 - M&I Resources (Source: lithiumamericas.com accessed 18/06/2018);

GSC – Constrained starter pit resource (ASX release 15 Jun 2018).
Favourable jurisdiction - Arizona

Power and gas line located just north of project area

Active mining district, Freeport McMoRan’s operating Bagdad porphyry copper mine is located 10km from the Burro Creek project.

Burro Creek east (area drilled to date) held under Arizona State Mineral Development Lease
- Environmental approvals in place & fully permitted for clay production
- Flora, fauna, archaeological, surface water studies all completed
- Recent drilling intersected water below clay horizons – under State lease is available for future production requirements

Burro Creek west held under federal placer claims
- Studies required to precede Notice of Intent submission to BLM for drilling
Surface Results

Strong results in new western claims similar to that recently drilled in east

Maiden drill program has tested only 1/4 of the total project area

For details of surface results refer to ZNC ASX Release 19th June 2018

Lithium clay outcrop 1140ppm Li
Drill Results

Thick;
Flat lying;
Near surface;
Widespread lithium clay beds; &
High potassium levels throughout.

For details of drill results refer to ZNC ASX Release 19th June 2018
Very encouraging initial metallurgical testwork#

- Up to 90% lithium recovery by acid leaching, with similar *acid consumption to Rhyolite Ridge;
- Up to 89% lithium recovery using calcine & water leach - similar approach to Bacanora at Sonora in Mexico.

For details refer to ZNC ASX Release 27th Sep 2017
Note - Zenith metallurgy based on bulk surface sample which may or may not be representative of clays below surface.
Exploration Target

Exploration Target\textsuperscript{1} for the Burro Creek project of 30-50 million tonnes at 1000 to 1100ppm lithium Li and 2% to 3% potassium, based on June 2018 drill results from eastern claims and from surface sampling - mapping in the western claim area.

Upcoming maiden resource estimate will report on the eastern claim area only, representing approximately 1/3 of the Exploration Target\textsuperscript{1}. It is expected that the western claim area targets will be the subject of a future drill campaign.

<td>2 to 3%</td>
</tr>
</tbody>
</table>

\textsuperscript{1}The potential quantities and grades are conceptual in nature and there has been insufficient exploration to date to define a Mineral Resource. It is not certain that further exploration will result in the determination of a Mineral Resource under the “Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves, the JORC Code” (JORC 2012). The Exploration Target is not being reported as part of any Mineral Resource or Ore Reserve.
Project Comparatives

Global Geoscience Limited (ASX:GSC - market capitalisation $A562 million as at 15th June 2018)

Rhyolite Ridge - 100% owned, Mineral Resource constrained by a starter pit - open pit shell of is focus of GSC’s pre-feasibility study.

³For details refer to GSC – ASX Release 13th June 2018.

Bacanora Minerals Limited (AIM:BCN - market capitalisation GBP116 million Source: BCN Corporate Presentation June 2018) are developing the Sonora lithium clay project in Mexico.

- Integrated plant has been designed at Sonora.
- Stage 1 processing 1.1 Mt of ore per year, - 17,500 tpa LiCO₃
- Stage 2 processing 2.2 Mt of ore per year - 35,000 tpa LiCO₃
- Plant design includes circuit to produce up to 30,000 tonnes per annum of potassium sulphate (K₂SO₄/SOP) from resource grading 1.5%K - source Bacanora website accessed 15/06/18.
Zenith has a clear strategy for adding shareholder value
1. Proven generative skills, move fast to acquire projects, Au,Li focus;
2. Smart, cost-effective exploration to progress projects and add value;
3. Use experience and corporate skills to deliver value-add to shareholders

*Refer to ASX Release 21st Sep 2017
USA/Mexico Lithium – Jim Mellon/Bradda Head JV
- Burro Creek – mineral resource estimate
- Mexican brine project – geophysics completed – results awaited
- New brine projects from generative study

Split Rocks
- Lithium pegmatite RC drilling completed – results awaited
- Further lithium surface geochem (~1000 samples – assays awaited)
- Cobalt-nickel aircore drilling completed – results awaited
- Gold – aircore drilling completed – results awaited

Kavaklitepe-Teck JV
- Drilling 2018 to follow up on exciting first pass 2016 drill intersections

Tate River
- Gold surface geochem - samples collected results awaited

Develin Creek
- Copper-zinc surface geochem (~1000 samples)
